

EWG Draft Final Report

EWG CRITERIA

- developing country impact
- financial aspects
- operational efficiencies

FINAL SELECTED PROPOSALS

Four financing mechanisms that will triple available funds for R&D for neglected diseases of the developing world

Five funding allocation
mechanisms that the EWG
believes will optimally allocate
both existing funds and new
funds raised by the four
proposed financing
mechanisms

Two efficiency proposals aimed at cutting R&D costs across the board

Finacing Mechanisms

- A new indirect tax (a consumer based tax)
- Voluntary business and consumer contributions
- Taxation of repatriated pharmaceutical profits
- New donor funds for health R&D

Funding Allocation Mechanisms

- Funding via Product Development Partnerships (PDPs)
- Direct grants to small companies and grants for DC trials
- Milestone Prizes: Innocentive
- End-Prizes (cash): Rapid Diagnostic Test for TB
- Purchase or procurement agreements

Efficiency Proposals

- Regulatory harmonization (Dev Country-focused)
- Pre-competitive R&D platforms
